- 5600 kg at 65 kmh
- 7500 kg at 40 kmh
- 8500 kg at 25 kmh
- 8750 kg at 20 kmh

Mullins Wheels has added a special application 20 x 22.5 wide single truck wheel to our range.

This wheel is typically suited for applications such as cane fields or sandy soils, where high flotation tyres are required to be used on truck or trailers.

This wheel is manufactured to international quality standards and is suitable for commercial truck & trailer applications.

Of course, with all heavy duty applications, the wheel must be matched with the correct tyre for each application.
